1. Mountain Bike Competition Levels

1.1. Club-level competition (Category 1)

Club-level competition refers to 'local' events run by clubs and similar entities with limited entrants from outside of the host town or city. A club-level event must not be branded as a state series or championship event.

1.2. State-level Events (Category 2)

State-level competition refers to higher-level events with an impetus on attracting entrants from outside of the host town or city, though typically from within the host state. State-level will typically attract up to 300 entrants and will have a greater emphasis on competition than club-level events.

1.3. National-level Events (Category 3)

National-level events are the highest level of competition managed by MTBA in Australia. These events include the National Series and Championships for; cross country (XCO), downhill (DH), short course cross country (XCC), and four cross (4X), and the National Championships for cross country marathon (XCM) and solo 24 hour disciplines. This level of competition also includes the Oceania Championships when they are hosted in Australia. These events aim to attract entrants from across Australia and from overseas, and have a focus on high-level competition.

2. Mountain Bike Competition Types

2.1. Cross Country (XCO)

XCO is the mountain bike discipline included in the Olympic Games, and provides a diverse riding experience including climbing and descending. An XCO course must be between 4km and 6km in length, preferably using the venue in the form of a cloverleaf to provide optimum course contact with the race village. No more than 15% of the course may be on paved or sealed road.

2.2. Cross Country Short Course (XCC)

XCC utilises a course of up to 800 metres in length, which should allow for passing opportunities throughout the entire course length. The course may have artificial features if they are safe and easily passable by the majority of riders.

2.3. Cross Country Marathon (XCM)

XCM utilises a course of between 60km and 120km. The event can be run in the following formats; single loop, point-to-point, or over a maximum of three laps. In the event of a single lap format no part of the course may be covered twice. In the event of a multi-lap event short cuts for some classes are not permitted.

2.4. Cross Country Eliminator (XCE)

XCE is a short course cross country racing format where riders contest a course up to 1km in length. Riders race in groups of four and are eliminated in a format similar to four cross racing. The course may include a range of natural and artificial obstacles. Qualification rounds will take place in a similar format to a 4X event.

2.5. Super D (SD)

A point-to-point event involving a predominantly descending course contested in a mass start, eliminator or time trial format. A Super D requires a course of at least 2.5km in length with multiple passing opportunities. The course length will often dictate the racing format utilised, with longer courses being more suitable for mass start racing.

2.6. Cross Country Enduro (XCEN)

A multi-lap cross country event based on a set time format of 1-24 hours in duration. Riders are judged on the number of laps they complete in the given time frame. Course length should be at least 5km, with a longer course required for larger competitor numbers.

2.7. Cross Country Point-to-Point (XCP)

A cross country format event utilising a point-to-point course of between 20-60km in length. Variations to course length may be allowed at the discretion of the event commissaire.

2.8. Cross Country Stage Race (XCSR)

A multi-stage cross country event that may include a range of different racing formats. Traditionally an XCSR would include a group of time trial events over one or more days, though may now include any connotation of the cross country events listed above.

2.9. Downhill (DHI)

DHI is a point-to-point format race involving a course of between 1.5km and 3.5 km. Total race time should be between two and five minutes. The course must contain a maximum of 3% paved roads and will consist of a variety of different terrain types. There should be an emphasis on technical skills rather than pedaling.

2.10. Four Cross (4X)

4X involves a descending course of between 30 and 60 seconds in length. The course should involve a variety of terrain including; jumps, banked turns, flat turns and natural terrain features. 4X is a competition that consists of qualifying round/s or timed qualifying, followed by a series of races (motos) where four riders share the one course. The first and second placed riders in each moto advance to the next round.

2.11. Bicycle Trials (OT)

OT involves short, marked sections of track that include a variety of technical challenges. Riders are penalised via a sliding points scale for mistakes made while trying to 'clean' the section. The regulations provided by the UCI Trials Commission will be used as a reference. Please see the separate MTBA Bicycle Trials Regulations document.

2.12. Cyclocross (CX)

Cyclocross is a hybrid XCO-style event where riders negotiate multiple laps of a course with a length of 2.5-3.5km. The event is run to a set time format. The course should include a variety of terrain including, grass, sealed roads, gravel roads and trails. The course must include a minimum of six obstacles that require riders to dismount. MTBA will defer to the UCI Cyclocross Regulations.
